portfolio

Summary

I am a dedicated college student currently in the seventh semester, excelling in programming courses and demonstrating a strong commitment to academic excellence.

Furthermore, I completed a technical course in programming that not only provided a solid foundation but also ignited a true passion for the field. This educational background has equipped me with a deep understanding of key programming concepts and technologies.

In practical terms, I have around 2 years of experience as a full-stack developer, actively applying my skills by developing web and mobile projects for various clients. Using advanced technologies such as ReactJS, React Native and NodeJS, I have created solutions that deliver exceptional user experiences.

My adaptability and ability to learn quickly have allowed me to seamlessly integrate these applications with various APIs, ensuring efficient functionality and personalized services.

Currently I have accumulated nearly 1 year of experience as a Full Stack Developer in a company, primarily focused on proficiently crafting software solutions while adeptly addressing challenges that may arise throughout the development lifecycle. My role involves the systematic use of unit tests and adherence to agile methodologies, ensuring the delivery of high-quality code. This experience has not only honed my technical skills but has also cultivated a problem-solving mindset essential for navigating diverse and dynamic development scenarios.

In summary, I am a passionate and responsible individual who thrives on challenges and seeks continuous professional growth in the dynamic field of programming and technology.

Experience

Technical consultant

Terios Agency

Aug 2023 - Present (8 months)

In my role as a Front-end Development Specialist and Technical Support in a development company, I am responsible for detecting and correcting errors in front-end projects. My work includes creating new components, providing essential support to address various requests in a variety of projects. Primarily, I use ReactJS and React Native for front-end development, occasionally assisting with minimal back-end tasks. This position places me at the center of multiple projects with diverse themes, contributing to the overall efficiency and success of the development team.

Freelance

Dec 2021 - Aug 2023 (1 year 9 months)

In my experience as a Freelance Web Developer, my work ranged from the initial design to the implementation and correction of projects and web pages. My multifaceted approach allowed me to actively participate in all stages of development, from conception and design to the final deployment, ensuring the delivery of functional and aesthetically appealing web products.

Education

Universidad Distrital Francisco José de Caldas
Engineering, Software engineering
Mar 2022 - Present
• Tecnologies as Java, C++, MySQL and Python
• Leadership and teamwork

Coursera
Introduction to Git and Gihub
Dec 2023 - Dec 2023

Coursera
Containerize a full-stack NodeJs applicaction in Docker
Nov 2023 - Dec 2023

Noble Work Foundation
Master JS, JavaScript development
Jun 2022 - Dec 2022
• Tecnologies asAngular, NodeJs and MongoDB
• Web development

Cisco Networking Academy
Essential programming
Aug 2022 - Nov 2022

Servicio Nacional de Aprendizaje (SENA)
Software development technician
Jan 2018 - Nov 2019
• Tecnologies as HTML, CSS and MySQL
• OOP concepts

Main skills

Node.js • MySQL • Angular • Git • React.js • ReactNative • TypeScript

Skills

CSS3 • Docker • Java • GitHub • HTML5 • Scrum • Teamwork • Unit tests in React

Languages

Spanish
Native speaker
